SWANSONS WELDING & FABRICATION

PPE CUBBY SYSTEM

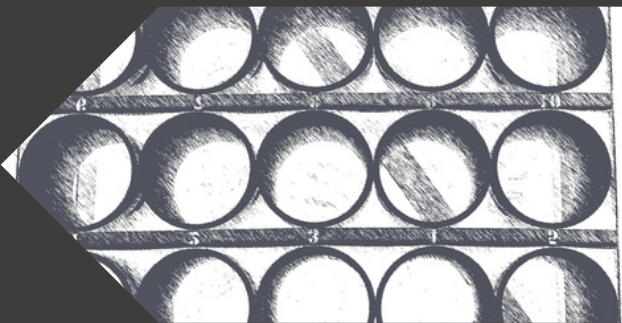

PRODUCT FUNCTION

The PPE Cubby System is made to operate in industrial environments. The 304 Stainless Steel Frame Construction is customizable with several built-in features and can hold as many or as few cubbies as desired.

Design Features

The design can be mounted on the wall or stand alone. It is easy to clean and maintain. The wall mount configuration has many design features including a robust hinge, closure system, and structural supports. This makes washdown easy.

CUSTOMIZATION

We also offer waterjet cut out labeling, as shown, making it easy to locate the corresponding employee number designation. Labeling can be customized to plant area or production location as needed.
